ASPIRING DATA SCIENTIST / DATA ANALYST

Tanga, Tanzania | +255 683 127 406 | bekasimon.01@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science and Business Systems graduate and aspiring data scientist/analyst with hands-on experience in data preparation, exploratory analysis, machine learning, computer vision, databases, and application development. Builds practical solutions that turn data into clear insights and useful digital workflows.

EDUCATION

KPR Institute of Engineering and Technology | Completed 2026

Bachelor of Computer Science and Business Systems | Distinction | Graduation ceremony and certificate expected Mar-Apr 2027 | Relevant study: Statistics, Machine Learning, Database Management, Data Structures, Software Engineering

Marwadi University | Completed 2023

Diploma in Computer Engineering | 2021 - 2023

EXPERIENCE

Data Analyst Intern | Connerstone Inc. | Jun 2024 - Aug 2024

- Cleaned and preprocessed datasets to improve consistency and readiness for analysis.
- Organized structured data and prepared reports that supported team analysis and communication.
- Collaborated with colleagues on data-focused tasks, documentation, and report preparation.

SELECTED PROJECTS

Employee Retention Prediction | *Google Advanced Data Analytics coursework*

- Analyzed 11,991 cleaned employee records, engineered an overwork feature, compared classification models with cross-validation, and achieved 96.2% test accuracy with a decision tree; translated model findings into practical retention recommendations.

Real-Time Sign Language Interpreter | *Collaborative AI project*

- Co-developed a webcam-based system using MediaPipe and a CNN-LSTM model to translate sign-language gestures into text and speech in real time, achieving 93.75% test accuracy.

ParishConnect Church Management Platform | *Ongoing full-stack MVP*

- Building role-based workflows for member and visitor records, households, QR attendance, contributions, announcements, and leadership reporting with FastAPI, SQLAlchemy, PostgreSQL, and JavaScript.

Desktop Face Recognition System | *Computer vision application*

- Built a Python desktop app that captures face samples, trains an LBPH classifier, and recognizes enrolled users through a webcam interface using OpenCV and Tkinter.

TECHNICAL SKILLS

Data & BI: Python, SQL, Pandas, NumPy, Excel, Power BI, Tableau, EDA, data cleaning, visualization

Machine Learning: scikit-learn, TensorFlow, model evaluation, feature engineering, OpenCV, MediaPipe

Development: FastAPI, SQLAlchemy, PostgreSQL, JavaScript, HTML, CSS, Git, GitHub, VS Code

Professional: Problem solving, communication, teamwork, leadership, adaptability

CERTIFICATIONS

Google Advanced Data Analytics course certificates | Issued Jul 2026

- Google Advanced Data Analytics Capstone; The Nuts and Bolts of Machine Learning; Regression Analysis: Simplify Complex Data Relationships
- The Power of Statistics; Go Beyond the Numbers: Translate Data into Insights; Foundations of Data Science

ADDITIONAL INFORMATION

Achievements: Graduated with Distinction; core team member, Facial Recognition Attendance System; college football representative | **Languages:** Swahili (native), English (fluent), French (beginner), Spanish (beginner)
